Texas Copper Mining and Man-

The last Weatherford Times contains bistory of this company as given by its Secretary together with its charter as amended, lis by-laws, the report of Prof. Deliver a letter from Joseph T. Wilson, Commissioner of United States Land Office, and the statement of the Chemical Assayer of the Baltimore and Cuba Smelting Mining Company, as to the worth of the ore. By this it appears that the Company was chartered in May, 1864, and organized in October following. By the amended acts of 1866, of October and November, the Company is authorized to erect and operate & manufactory fer copper, iron, sulphur, and saltpeter, at such place as may be selected within the counties of Clay, Wichits, Archer, Wilburger and Baylor, and the time of the charter is extended from 25 to 60 years. It appears, further, that the Company have located about 12,000 acres of land, near the center of Archer county, and have obtained parents for 8,960 acres of the same, and patents will soon be obtained for the remainder. It has also 2,000 acres of genuine land certificates, which it intends to becare soon on timber and ceal lands. No work has settled condition of that region, continual- and El Paso together with Texas Pacific ly infested by the Indian raiders, and the is said to Huntsville, where our State Pen- want of convenient transportation to a Call and See itentiary is located, and had not returned market. INDIANG IN LLANG AND RUBNET On Tuesday night last, early in been nominated by the Labor Reform Con the evening, the Indiana passed down Llano county, through Barnet, and came to within three and a half miles of Bluffton, and what is there called the "Colorado Sa-'ine." They shot at William Miller, the arrow striking him on the side, passing through his clothes and at most making but a slight wound. These same Indians have been seen as late as Thursday last, the 15th inst., in the Crownover settlement' but what damage has been done in apply to the way of murdering and stealing we have not learned. These facts have been furnished us by D. C. Cowan, Esq., an carly settler-in fact one of the first of the Fisher & Miller Colony-in Llano county. who is a frontiersman of undoubt ed grit, and a Democrat of the first

water - Statesman, 20th. The year 1871, so disastrous to many fire insurance companies, was one of unexampled prosperity to the NORTH MISSOURI' of the fire it comes, with assets more than doubled; and now with record untarnished, offers indemnity to all who are willing to pay an adequaterate. Jso D. KERFOOT, Agent, Dallas, Texas

"There was a frog who lived in a spring, He caugh: such a cold that he could no

Poor, unfortunate Bairschian! In what a sad pligat he must have been. And yet his misfortune was one that often befalls singers. Many a once tuneful voice among those who belong to the "genus home" is utterly spoiled by 'cold in the head," or on the lungs, or both combined. For the above mentioned "cronker" we are not aware that any remedy was ever devised; but we rejoice to know that human singers may keep their heads clear and their throats in lune by a timely use of Dr. Sage's Catarrh Remedy, and Dr. Pierce's Golden Medical Discovery, both of which are sold by druggists.

What Dy spepsin May End In.

Starvat on to the Midst of Plenty A living man is continually exerting mechanical force and giving off heat; and in preportion he is continually undergoing a best of weight—that is to say a loss of substance. This iffe-long production of heat and of machanical force is not suspended even during step. Not to pr further, sleep does not interrupt respiration—a clearly mechanical function. As to the goneration of heat it is unnecessary to insist. It is plain that this ceaseless manifesting of vital force with its accompanying and strictly preportioned waste could not continue forever. The man would deviable to multing. But long lefus the effects of this gradual diminution become apparent, they are fell in the form of the two imperiors sensations—image and thirst. To still these cravings, to restore the lost weight, and to put the man in a president all to keep on losing weight (as cravings, to restore the lost weight, and to put man in a position still to keep on losing weight the clisifical force) it is increasing that he should supplied with three things—air, water and it now strayly receiving ond into the stounch is receiving food into the system. Strictly apeals food by high to the stounch is as truly collined and within the body as it flood by his thouless of the strong high the str outcome exceeds the income; and the bodity strength fails because the system can no longer keep up the murnally belancing was to and reporation. Here it is that a londe stimulant (such as Pr. Foch's Bitters) provess so beneficial—it Hight almost be said, so in dispensable.
